

EXPERT TIP

Don't be afraid to relocate your kitchen if it will ultimately make it more functional.

We love the lavish width of the marble island bench. Nothing says luxury like it.

SHAKER STYLE

"If you ask anyone with a pool and young children what their number-one concern is, it'll most likely be supervision. So when it came to renovating, we chose to relocate the kitchen, opening up the new area to all facets of the home, both inside and out, so that a direct line of vision to the pool could be established. The design not only provides a great view for those facing the fabulous food-prep area but, thanks to the mirrored splashback and oven fronts, even those with their backs to the action can still keep an eye out while cooking. Of course, the sleek Shaker stylings coupled with rich organic materials such as marble and oak have created such a beautifully integrated design, you could be forgiven for not identifying the essentially functional, and potentially life-saving, status of this kitchen. This is peace of mind served with style."

Designer: Ruard Gerritsen for Nobby Kitchens
